Availability: Fall 2025 (Flexible)

EDUCATION

Northeastern University

Boston, MA

Bachelor of Science in Computer Science and Business Administration (Fintech)

Sep. 2021 – May 2025

Relevant Coursework: Software Engineering, Object Oriented Design, Algorithms and Data, Database Design, Blockchain and Cryptography, Foundations of Data Science, Strategy, Investments, Marketing, Accounting

TECHNICAL SKILLS

Languages: Java, C#, Python, YAML, Powershell, Bash, HTML, CSS, JavaScript, TypeScript, SQL

Frameworks: .NET, React, Express, Node, Bootstrap, Tailwind, Vue, Swagger

Developer Tools: Visual Studio, VS Code, Git, Azure DevOps, AWS, SSMS, IntelliJ, Jupyter Notebook

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Altair, D3, Jest, Mongoose, FakeItEasy, JUnit

EXPERIENCE

Verisk Extreme Event Solutions

Boston, MA

DevOps Engineer Co-op

Jul. 2024 – Dec. 2024

- Created and tested composite actions and reusable workflows in CI/CD pipelines
- Enhanced security and compliance by integrating vulnerability scanning, license checks, and dependency reviews
- Implemented a new deployment strategy leveraging Github Releases for 11 repositories, eliminating existing issues with versioning and retention
- Actively updated repository workflows to non-deprecated versions of Node or GitHub actions
- Diagnosed and resolved issues quickly in development environments to minimize downtime

Verisk Extreme Event Solutions

Boston, MA

Full-stack Software Developer Co-op

Jul. 2023 – Dec. 2023

- Developed RESTful APIs for seamless communication between frontend and backend of an internal website
- Designed sleek, user-friendly UI that showcased Azure DevOps team performance and sprint history analytics
- Created unit tests for old functions, increasing branch and line coverage
- Performed a large codebase cleanup and abstracted old or obsolete functions
- Updated documentation for functions and components for developers and end consumers

PROJECTS

Life Expectancy Indicators | *Python, Altair, D3, HTML, CSS, Jupyter Notebook*

Mar. 2025 – Apr. 2025

- Worked in a team setting to create a website with five detailed data visualizations analyzing socioeconomic factors impacting a country's life expectancy
- Used Python and JavaScript libraries to clean, analyze, and generate interactive graphs from large datasets
- Cross referenced and researched credible sources relating to the topic to make conclusions on our analyses

Fake Stack Overflow | *React, TypeScript, MongoDB, Jest, Mongoose, Git*

Jan. 2025 – Apr. 2025

- Developed a full-stack dynamic web application mimicking the StackOverflow discussion forum
- Implemented RESTful APIs and persisted data in a database for backend communication
- Supported role-based access control (user, mod, admin) for user authentication including CRUD operations on data

EXTRA CURRICULARS

FirstByte

Northeastern University

CS Curricula Co-Lead

Sep. 2022 – Present

- Leading a team of 5-10 to teach STEM/CS skills in a digestible manner to younger students
- Fostering an inclusive, accessible, and diverse learning environment for students of underprivileged backgrounds
- Partnering with local schools and programs to deliver engaging and informational workshops for beginner CS concepts

HOBBIES

In my free time, I enjoy reading books, practicing piano, and playing video games :)
